EXAMINER'S AMENDMENT

An examiner's amendment to the record appears below. Should the changes and/or additions be unacceptable to applicant, an amendment may be filed as provided by 37 CFR 1.312. To ensure consideration of such an amendment, it MUST be submitted no later than the payment of the issue fee.

Authorization for this examiner's amendment was given in a telephone interview with Richard Bridge on 8/24/06.

The application has been amended as follows:

In the claims:

In claim 22, line 1, "claim 16" has been changed to --claim 20--.

In the drawings:

The following changes to the drawings have been approved by the examiner and agreed upon by applicant: In Fig. 10, "P1" has been changed to --SP1-- and "P2" has been changed to --SP2--. In order to avoid abandonment of the application, applicant must make these above agreed upon drawing changes.

The following is an examiner's statement of reasons for allowance:

Claims 1-12 would be allowable because there is no teaching or suggestion in the prior art of an apparatus for depositing a pattern of adhesive comprising the combination at least first and second nozzle units aligned in a direction of alignment; a delivery system for delivering adhesive to the nozzle units, the delivery system comprising a manifold having first and second adhesive supply ports, located one above the other, through which adhesive is supplied to the

Art Unit: 1734

nozzle units, and a transfer plate disposed between the manifold and the nozzle units, said nozzle units being secured to said transfer plate, supply passaging in the transfer plate for the delivery of adhesive from the manifold adhesive supply ports to said nozzle units, said supply passaging comprising a first elongate supply channel in a first face of the transfer plate in fluid communication with said first adhesive supply port in the manifold, and a second elongate supply channel in said first face of the transfer plate in fluid communication with said second adhesive supply port in the manifold, said first and second supply channels extending in said direction of alignment and being located one above the other in stacked relation; and a mounting system for mounting said transfer plate on the manifold, said mounting system allowing adjustment of the position of the transfer plate and nozzle units thereon relative to the manifold in said direction of alignment, said manifold adhesive supply ports remaining in fluid communication with the respective supply channels during said adjustment.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."

Any inquiry concerning this communication or earlier communications from the examiner should be directed to Laura Edwards whose telephone number is (571) 272-1227. The examiner can normally be reached on Monday-Friday.
